

# Flood Preparedness Assessment

## Consultation Synopsis

It pays big dividends to understand what you're getting into, and how you're going to successfully deal with it. The smart money says the Green River is a big flood threat this fall, winter and spring. We help you identify risks, analyze impact, identify alternative paths, and build a package of tactics, maintenance, and drills for recovery.

## IT-Lifeline Consultant

### John Ames, Vice President of Business Continuity Practices

John has been involved in disaster recovery and business continuity planning for over 34 years. His work experience includes over 18 years with Washington Trust Bank, and 8 ½ years with Database, Inc. (now Iron Mountain) and Database Recovery Services as a Disaster Recovery/Continuity Planner.

John was Chair for the Alliance for Business Continuity & Disaster Preparedness since 1998 and currently serves as its Co-chair. He presently chairs a Regional Health sub-committee that is addressing pandemic planning for business & industry.

## Flood Preparedness Assessment Consultation Outline

Your consultation will center on what we call the 'three legged stool' of business continuity that includes analysis, planning, and testing. During your assessment

**Analyze:** In this step we help you determine exposures and impacts—operational and financial—and establish acceptable levels of functionality and acceptable timelines.

**Plan:** Determine essential actions and responsible parties necessary to re-establish the workplace and support services.

**Test:** Ascertain how prepared you are to execute your flood recovery strategy and estimate your probability of success.

## Schedule & Fees

The IT-Lifeline Flood Preparedness Assessment consultation is a \$150 phone-based session we schedule to fit your business needs—we will be at your service and work according to your timeline.

**Please call Jan  
at (866) 394-0101,  
extension 1617,  
to set up your  
consultation today.**
