

The IT-Lifeline/EMC Data Domain Solution Configuration

The IT-Lifeline/Data Domain solution configuration brings together the streamlined data handling, continuity capacity and human expertise that information-rich organizations need to compete, recover and continue.

With EMC/Data Domain you achieve definitive data storage efficiency, security and accuracy, and cash- and time-saving data transfer speeds. Since, Data Domain appliances reside at both your end and at IT-Lifeline, application and data replication and recovery is surefire.

Although IT-Lifeline delivers exceptional business continuity solutions, including recovery suites, data vaulting, cloud recovery, collocation and more, it's the human element that sets us apart.

*IT-Lifeline's recovery engineers live and breathe recovery scenarios—there is virtually no situation they haven't experienced. Theirs is the kind of attention to detail essential to the complex task of re-establishing your technology environment.

Your IT staff takes care of business; our recovery experts take care of you.
